

Welcome

Flexiform is once again working on some exciting projects for some exciting clients, we have recently completed a fit out for VTB which is featured below. Our Redbanana range of furniture was given a centre stage by Rossi Di Albizzate at 100% East as part of London's 100% Design exhibition.

Outside of Jot the year is flying by, the clocks have turned back, its getting cold and windy but it does mean that the industry party season will soon be upon us, so we look forward to seeing you all out and about for a drink or two before Christmas.

Jot Lockers

Flexiform have always prided them selves on being able to offer bespoke ideas which become ideal solutions when we offer no standard product that will suffice.

Over the last year one bespoke solution has become extremely popular, both Public and Private sector clients are continually trying to cut down on the amount of wasted space in a work environment and this has lead to a strong increase in the design and manufacture of unique office locker systems.

Personal organisers and pedestals are a fantastic way to keep current work, projects and filing close to hand, however as changing technology continues to dictate how are workspace environments are evolving it means we are rapidly heading towards the ideal of paperless offices. This in turn means that pedestals are often either not being used at all or are being used for personal affects and items that are rarely used or leave the pedestal drawer.

Bespoke designed key lock and code lock lockers have been manufactured and installed to many of Flexiform's projects this year and are a great way of storing staff's personal items without having a pedestal in the immediate workspace.

For more info on Jot Design Lockers don't hesitate to call us.

Flexiform Install Glass Desktops

Jot Design are finding that coloured glass is creeping into their office designs more and more. They are a great way to add an original fresh look within the workspace. Jot work with a fantastic supplier of coloured glass called 'Specialist Glass'. Jot now use glass to finish off lateral storage tops and they have just installed their first glass desktops.

'Online Reprographics' have been a friend of Jot for years, as a print and repro company they are often cutting, splicing and gluing printed materials. The Glass is the perfect option for the desktop as it will not scratch. A Cutting knife could be used straight over the glass. It looks stunning in a bright red and matches the task chairs.

The Bench system is on full view through the large windows at Online Repro and already receiving a lot of enquiries and attention from passers by.

In Focus - VTB Bank Group

The VTB Group is the first Russian owned international banking group which makes it possible to service it's businesses Worldwide. It has strong links with the Russian Government and aids in helping develop key industries, enhancing stability and competitive strength of the country's financial segment throughout the world.

VTB London is looking to expand massively by the end of 2010 and steps are under way. Kevin Leahy Services & Security Manager has been working closely with Jot Design over the last few months to create a fantastic workspace for the 50 strong team of employees. No architects were involved in the project and the colours and space plans were drawn up between Jot and Kevin at VTB. 2 man back to back benches were used with a wave, these had white tops which looked fantastic with the bright blue Perspex screens.

A range of Jot Silver lateral storage units were also installed by the Jot Team. The task seating were supplied by Jot partner's - Connection. VTB took a step towards reducing their carbon footprint by ordering the new Eco-Start chair which claims to be 98% recyclable (reviewed in last months newsletter). Monitor arms were supplied by Colebrook Bosson Saunders and networking points and sockets by Office Electrics.

The project was completed on time and within budget and we have since spoken to Kevin who is very pleased with the overall project. "Everyone involved was a credit to Flexiform - five star rating, many thanks".
