

## homeworker desk

“Delivered flat packed, it took only minutes to build!”  
- K

“Hello Flexiform – Just a quick note to say thank you for the Homeworker desk, it is fantastic.

As the Pandemic continues, working from home became an increasing part of daily working life. I think like most of the country, this took me by surprise, but thinking it was only for a week or so I set up office on the kitchen table. It was soon obvious with a young family, that was far from ideal. Not forgetting the terrible back pain and arm ache I got from perching on a kitchen stool with a cushion on! Then through my partner came the Flexiform Homeworker desk – what a fantastic idea. Delivered flat packed in a box, with great instructions an allen key tool and only 8 fixings, it took a few mins to build. The desk is supplied in white so its not offensive at the top of our stairs, lets be honest, no one wants a desk in their living room, so a small discreet desk is what most people need, something that can sneak into a small space in the corner. That’s why this is perfect for us, in fact you hardly know its there, and its so solid! We have managed to back ours against an existing shelf already there (coincidentally the perfect height) which gives us an extra 60 mm on top of the 800mm depth.

I also ordered a power module which sits on the desktop with USBs for charging my phone and laptop power (no rummaging under the desk for the plugs!) The chair is not a standard office chair as I wanted something more suited to our home décor so I picked an Olé swivel chair. It looks great in situ and is actually part of the house rather than a lump in the corner.

I can honestly say the wrist and back pain has gone! After doing a little research desk height and depth are key to comfortable working. So, now I start work out of the way of the family and can leave all my equipment plugged in out of the way. Thanks to Flexiform team for supplying such a simple but effective idea.”
