Materials

Laminate Top Panels: MDF (Medium-density fibreboard) substrate with Laminate face.

Steel: Powder coated steel with minimum paint coverage thickness of 35 Microns. Indentation, cross cut+adhesion and bend tested.

Fenix NTM®: Multilayer coating and the use of next-generation acrylic resins which are hardened and fixed through an Electron Beam Curing process. With low light reflectivity, their surface is extremely opaque, soft touch and anti-fingerprint. Highly resistant to scratches, abrasion, dry heat, acid-based solvents and household reagents. Micro-scratches in the top can be healed by thermal healing. Unique non-porous external layer, allowing the material to stay neat with simple, everyday care and cleaning methods. They are also suitable for contact with food.
