flexiform

LUCIE CARR, FLEXIFORM SPACE PLANNER

“because pico is so versatile and comprehensive, it’s great for the smallest to the biggest of businesses”

Pico desks are available in various configurations, including single stand-alone desks (1), side-to-side (3), back-to-back (2) or 120 degree desks (featured on page 15). Multiple configurations offer both design flexibility, maximising the available space to suit your needs. The stylish Pico range fits every part of the workplace, from collaboration areas to executive desks and offices.

2

VERSATILE DESKING RANGE

The Pico range has been designed for all areas of the workplace, particularly suited to open plan working. Pico is available in a range of sizes, configurations and colours, creating a truly flexible workplace solution. This flexible range is ideal for hot desks, collaborative working, quiet work zones, and executive offices. Add in privacy screens and personal storage to the open plan areas to create permanent staff positions.

A cost-effective bench system, Pico is designed to create large desk clusters using shared components. By sharing frameworks, alongside other components, entire buildings can be fitted out quickly and effectively.

Extend a single desk into a side-to-side desk (pictured). Desks can be extended or reduced in size at any time! Available with optional modesty panels.

**Height adjustable
desking provides ease
and comfort for all
your staff.**

HEIGHT ADJUSTMENT

Pico can be easily customised to provide the ultimate ergonomic solution, with height adjustable desks available in two options. Fixed height kits permanently increase the desk by 40mm, 60mm, or 80mm, up to a height of 820mm. Crank handle Pico desks can be raised up and down easily, from 740mm to 860mm, with the handle tucking away when not in use. With all height adjustable options, the front beam is removed to give clear leg space for taller staff members. Height adjustable kits can be retrofitted at any time on each Pico worksurface, including back-to-back desks.

Pico is perfect for collaborating. Available with a uniquely shaped layout, Pico's 120° deep desk tops curve around the user, providing a large working area. With 120° desking, users face each other, encouraging group working and cohesion. As an optional extra, screens can be added to offer privacy without hindering collaboration.

See our E.ON case study online to see these 120 degree desks in action!

PICO

Pico is a comprehensive desk system with configurations and options available to suit every office. From an executive single-person office, to a large capacity open-plan workplace, Pico adapts to the company's exact needs.

FEATURES & BENEFITS

- Modular systems specified in starter and extension blocks, reduce or extend desks at any time to suit your needs.
- Single, side-to-side, back-to-back or 120 degree configurations.
- Rectangular, single wave, double wave or workstation tops.
- 800 - 1800mm wide worktops (25mm thick).
- 740mm high as standard.
- 600mm or 800mm deep tops (single & side-to-side desks), back-to-back desks are 1250mm or 1650mm deep.
- 3 leg styles: Goalpost, A Frame and Rectangular Loop.
- Large range of finishes to suit any interior.
- Crank height adjustment kits can be fitted at any time to increase the desk by 120mm (Max size: 860mm).
- Fixed height adjustment kits can raise the desk in 20mm increments to give finished heights of 780mm, 800mm or 820mm.
- Finish with screens or screen infills.
- Tested to BS/ EN527:2002 Part 2 (2011), BS/ EN527:2003 Part 3, BS4875:2001 Part 5 to level 4, BS6396 (2008), BS EN ISO 9241 Part 5:1999.

CABLE MANAGEMENT

- Comprehensive cable management system.
- Cables feed from floor grommets, up into cable towers in the centre of the desks, and into cable trays.
- Sliding top design to access cable trays.

Side-to-side 3 Person Desk Configuration

Pico desks are equipped with sliding tops allowing easy access to the cable trays. The high capacity cable trays have cable ties and clamps to keep under-desk power in place.

Pico desks are fully cable managed, and capable of handling the most demanding IT set up.

Cable towers feed cables from the floor grommets, up into the cable trays in each desk. A removable door on the towers gives easy access to the cables.

FULL IT SET UP

Team up Pico with monitor arms, on-desk and in-desk electrics, lights and CPU holders for a complete IT set up. Flexiform will supply and install it all - providing you with a fully integrated desking system. Pico is designed to accept most standard IT equipment on the market to suit any working environment.

- Adjustable, ergonomic monitor arms feed cables from underneath the desk top neatly into the monitor.
- Monitor arms can hold between 1 and 6 screens.
- On-desk electrics for charging phones and devices, or connecting additional equipment easily, without sliding the top forwards.
- CPU holders raise CPUs off floor, allowing easy access and keeping the equipment cool and ventilated.

SCREENS

Offering privacy in an open office environment, Pico is designed to accept various styles of screens, including Flexiform's aluminium framed screens, and our versatile Fyn range. Aluminium framed screens are available with plexiglass, polycarbonate or pinnable fabric inners, and feature an integral tool rail to hold screen accessories, helping staff organise their work. Flexiform's acoustically designed Fyn screens absorb sound, and zip together to provide ultimate flexibility. Available in 8 fabric ranges, with 5 zip colours and stitched edges, Fyn screens offer a softer aesthetic to your workplace.

Go without a screen and get your staff collaborating - all Pico desks are available with an infill tube.

let's get a little technical

FRAMEWORK

All Pico frames and legs are manufactured from cut steel tube for strength. Beams are fabricated from 40mm x 25mm tube, and legs from 60mm x 30mm tube. Tested to over 200kg of imposed load with minimal deflection. Steel is powder coated with minimum paint coverage of 35 Microns. Indentation, cross cut+ adhesion, and bend tested.

Please note: Do not sit on worktops when the tops are fully extended.

CABLE MANAGEMENT

Pico desks have a simple but effective high capacity cable system using desk mounted cable trays and cable towers. Shared cables feed up the cable tower into the cable trays. Cable trays are accessed by sliding the worksurface forward, providing a 175mm full width access section to the rear of the worksurface. Power and data outlets can also be mounted directly to the worktop or screen which meets BS6396 (2008).

WORKSURFACES

FSC®-C015991 certified. Our Pico desk worksurfaces are 25mm melamine faced chipboard (MFC) with 2mm ABS matching edging as standard. Tops can be supplied with contrast edging (as shown) including a black edge as specials. Our tops meet British standard 476 class 1 surface spread of flame, and E1 European standards on Formaldehyde emissions. Alternative tops including laminate can also be supplied, please contact a Flexiform representative on 01274 706206 for more information.

HEIGHT ADJUSTMENT

Pico desks are available with 2 height adjustment kits: fixed height and crank handle. All kits can be retrofitted but it is advised to be specified upon order of the desk. Crank handle desks allow the top to be raised up to 860mm (120mm increase) and can be moved up and down easily by the user. The fixed height kit raises the desk by 40mm (total height: 780mm), 60mm (800mm) or 80mm (820mm) and is static at these heights.

SCREENS

Pico desks can be installed or retrofitted with privacy screens or an infill tube if no screens are desired. Flexiform have 2 standard screen ranges available, including our fabric zip screen system Fyn, or our aluminium framed screens. Each of our screen systems connect directly to the Pico frame to allow the desk tops to slide. Our aluminium frame screens are 30mm thick x 370mm high and can be filled with plexiglass (acrylic), polycarbonate or fabric. Available with 1 or 2 built-in rails for hanging accessories such as pen trays. Fyn screens are available in 8 popular fabric ranges, and 5 zip colour options. Each screen is 40mm thick x 370mm high.

AVAILABLE DIMENSIONS

Pico desks are available with 800mm, 1000mm, 1200mm, 1400mm, 1600mm and 1800mm wide tops, each 25mm thick and either 600mm or 800mm deep*. Please note we would always recommend a 800mm deep desk. All Pico desks are 740mm high as standard. When extending desk tops, the width of the desk can alter (e.g. 1400mm desk connected to a 1800mm wide desk). A back-to-back desk configuration has a 50mm gap between tops, to allow for a screen or infill tube, giving an overall size of 1250mm or 1650mm.

*Measurements with rectangular tops, alternate top shapes have varying sizes.

WARRANTY

Our Pico desks are accredited to the following standards: BS EN 527:2002 Part 2 (2011), BS EN 527:2003 Part 3, BS4875:2001 Part 5 to Level 4, BS6393 (2008) and ISO 9241. Pico desks come with a minimum warranty of 10 years from the date of installation.

All frameworks have been tested to over 200kg of imposed load with minimal deflection.

AFTERCARE

Due to their resistant surfaces, our worktops do not require any special maintenance. For light soiling, clean with a paper towel, soft clean cloth (dry/damp) or sponge. If using a damp cloth, dry the surface with an absorbent paper towel or microfiber cloth. For normal soiling, clean with warm water, a clean rag, microfiber cloth, soft sponge or soft brush. Use non-abrasive domestic cleaners, remove all traces of cleaning agent with fresh water, and dry the surface with an absorbent cloth or paper towel. Please ensure no liquid accesses the power modules during cleaning. If this occurs, isolate from the electrical supply immediately and consult a qualified electrician.
