space saving storage.  
the right quantity, size and  
style of storage is key to  
maximising and styling any  
office or education space.

flexiform have been designing and  
manufacturing storage for 50 years,  
let us show you what we've learnt

flexiform

“

LIZ DAWES, STORAGE SURVEY ANALYST

having the right type of  
storage can improve staff  
efficiency and wellbeing.”

### The importance of Storage in the Workplace

---

With over 40 years of designing and manufacturing storage, Flexiform have seen the office environment change and develop with the advances of technology. Storage still plays an important part of any functioning office. We all love the idea of having a minimal, visually open plan office. However, there is no reason that storage can't fit into this. The right solution is key to ensuring an open plan office is kept clean and tidy.

An important aspect of designing and installing your ideal workplace is getting to know the space, and with our filing and site surveys, Flexiform aims to understand the specific needs and requirements of your organisation. Firstly, by assessing how many linear metres of storage you need, we can accurately calculate your filing needs, from plan chests for a planning department, to pull-out filing for administrative staff, or collaborative furniture for creative minds. This allows you to maximise the office space and reduce footprints with our large capacity storage ranges.

Our storage is designed to maximise the storage capacity, while maintaining a small footprint in order to make the most out of any space.

The diagram below illustrates 68% of the floor space is saved to be re-purposed by simply swapping traditional storage to high capacity storage. One Freestor unit can provide 5.7 linear metres of storage occupying 0.475sqm of space compared to 1.5sqm.

The diagram below compares the operating space of our tall Freestor Tambour range in comparison to a traditional 4 drawer unit.

In comparison to the 4 drawer filing units, the Freestor Tambour occupies **30% less** floor space when not in use and **50% less** floor space when in use. Reducing the floor space required from 5.2 SQM to 2.6SQM

freestor

**Our Freestor lateral range consists of side filer drawers, hinged doors and combination units. Combination units have a mixture of hinged door, drawers and flipper compartments for multi-functional storage.**

Freestor tambours, acoustic tambours, hinged door and combination units shown with Pico desks and fyn screens

Tailor units to staff needs with a large range of internal components

Freestor hinged door and combination unit  
Inside components: Pigeon holes and plain shelf

Freestor hinged door and side filer  
Internal component: plain shelf

# freestor lateral

Freestor lateral units include hinged doors, side filers and combination units, suitable for all areas of office.

## FEATURES & BENEFITS

- Efficient storage capacity with 948mm of filing width per shelf for a 1000mm unit.
- Side filer storage with 12 inch drawers available in 2, 3 or 4 drawer configurations.
- Hinged door storage with 120 degree opening for easy access.
- Gooseneck handle for easy opening.
- Central locking with master keys available.
- Anti-tilt mechanism as standard.
- Side filer components available including side-to-side rails and front-to-back rails.
- Full range of components including plain shelves, slotted shelves, lateral plain shelves with integrated suspension rails, lateral suspended filing rails or coat shelves (see back of brochure for details).
- 1677mm and 2007mm combination units available including flippers or hinged doors with side filers.

## SPECIFICATION

- 800mm, 825mm or 1000mm wide
- Hinged door has 8 height options from 720mm to 2007mm
- Side Filers are available as 2 drawers units (720mm or 740mm), 3 drawer (1017mm) or 4 drawer (1322mm)
- All combination units are either 1677mm or 2007mm tall with a minimum of 3 drawers per unit.
- Depth: 475mm

Bottom Image: Side-to-side filing.

Freestor tambours and  
acoustic tambour units are  
our most popular range.  
The doors curl up inside  
the unit to create a  
compact operating area

Freestor acoustic tambours absorb  
distracting noise in the office

Freestor tambours have a range of internal components to tailor units to staff needs. Our storage surveys analyse the type, components and quantity each department requires, specifying units to save space and money.

Freestor tambours. Internal components include lateral suspended shelves, 18" pull out filing frame, drawers, pull out worksurface and pigeon holes

# freestor tambour

Freestor tambours have a compact footprint and large storage capacity. The doors curl up within the unit creating a small operating area and have a wide range of storage components to tailor the units to each staff's needs.

## FEATURES & BENEFITS

- Easy grip inset handle with magnetic aluminium slam rail.
- Doors curl up into the unit giving full access to the unit.
- Fully welded carcass for exceptional rigidity and stiffness with no joins in the carcass to front or side elevations.
- Floor levelling.
- 15mm steel top or 25mm MFC top with 2mm ABS edging
- 2-point locking Lowe and Fletcher lock type 5689-2.
- 12.7mm slot centres to fit adjustable internal components.
- Components include plain shelf, slotted shelf, pigeon hole, lateral plain shelf with fixed suspension rails, lateral suspended filing rails, coat rail with shelf, pull out shelf, pull out filing frame with 2 adjustable rails, long rail A4 suspended rails, single drawer, 8" or 11" system drawers (see back of brochure for details).
- Optional acoustic perforated shutters allowing acoustic waves to enter and be absorbed with sound absorption EN ISO 11654:1997, acoustic absorption class C, NRC value 0.8, M3 fire rating.
- Extra deep tambour wardrobe with coat rail, shelf and ventilated back.

## SPECIFICATION

- Width options include 800mm, 825mm or 1000mm
- Height options include 695mm, 715mm, 720mm, 740mm, 1017mm, 1090mm, 1110mm, 1200mm, 1322mm, 1490mm, 1677mm or 2007mm
- Acoustic tambours are available in 1110mm, 1200mm, 1322mm and 2007mm
- Depth: 475mm as standard. Wardrobe 600mm
- 94% recyclable (based on a standard tambour)

flexilink

# flexilink

Flexilink is a simple shelving system consisting of 4 components; back panels, side panels, end panels and shelves. Suitable for any location requiring high density, accessible storage such as libraries, offices and mailrooms.

## FEATURES & BENEFITS

- Versatile mild steel shelving system.
- Constructed from back panels, side panels, end panels and shelves.
- Mix and match components to create a bespoke configuration.
- Single sided or back-to-back configurations.
- Plain shelf, plain with suspended filing or slotted shelves with dividers.
- Adjustable shelves in 25mm increments.
- Ventilated or solid panels.
- Bespoke cladding available.
- Available in various RAL finishes.
- Bespoke hanging rails available.

## SPECIFICATION

- Standard heights: 975mm, 1275mm, 1575mm, 1875mm, 2175mm.
- Standard depths: 250mm, 300mm, 400mm, 500mm, 600mm.
- Standard widths: 600mm, 800mm, 900mm, 1000mm, 1200mm.
- A combination of bay widths can be used to create a bespoke storage solution.
- Minimum of 2 bays.

# components

All our storage ranges are available with a large range of components to tailor storage to the users needs.  
The style and quantities of components can be easily selected with help from our in-house storage survey specialist.

## JOT COMPONENTS

### Plain Shelf

Ideal for storing Lever Arch Files, boxes and miscellaneous items.

### Slotted Shelf

For use with dividers, a slotted shelf is useful for items that lack rigidity such as magazines, shelf files and wallets.

### Pigeon Hole Shelf

Suitable for traditional pigeon holes for internal mail or storing A4 and A5 forms or literature.

### Lateral Plain Shelf with Fixed Rail

This shelf stores items like a traditional plain shelf, but can also store suspension files on the rail under the shelf, providing greater flexibility.

### Lateral Suspended Filing Rails

For fixed side-to-side suspension files.

### Front-to-Back Filing

Suitable for drawers only, allows for suspending files front-to-back in 2 rows.

### Side-to-Side Filing

Suitable for drawers only, allows for suspending files side-to-side.

## FREESTOR LATERAL COMPONENTS

### Plain Shelf

Ideal for storing Lever Arch Files, boxes and miscellaneous items.

### Slotted Shelf

For use with dividers, a slotted shelf is useful for items that lack rigidity such as magazines, shelf files and wallets.

### Pigeon Hole Shelf

Suitable for traditional pigeon holes for internal mail or storing A4 and A5 forms or literature.

### Lateral Plain Shelf with Fixed Rail

This shelf stores items like a traditional plain shelf, but can also store suspension files on the rail under the shelf, providing greater flexibility.

### Lateral Suspended Filing Rails

For fixed side-to-side suspension files.

### Front-to-Back Filing

Suitable for drawers only, allows for suspending files front-to-back in 2 rows.

### Side-to-Side Filing

Suitable for drawers only, allows for suspending files side-to-side.

## FREESTOR TAMBOUR COMPONENTS

### Plain Shelf

Ideal for storing Lever Arch Files, boxes and miscellaneous items.

### Slotted Shelf

For use with dividers, a slotted shelf is useful for items that lack rigidity such as magazines, shelf files and wallets.

### Pigeon Hole Shelf

Suitable for traditional pigeon holes for internal mail or storing A4 and A5 forms or literature.

### Lateral Plain Shelf with Fixed Rail

This shelf stores items like a traditional plain shelf, but can also store suspension files on the rail under the shelf, providing greater flexibility.

### Pull-Out Filing Frame

This filing frame holds 2 rows of front to back suspended filing and pulls out of the unit for ease of use.

### Lateral Suspended Filing Rails

For fixed side-to-side suspension files.

### System Drawers

Pull-out drawers with optional dividers for storing general stationery items, IT equipment, chargers and cables.

### Long Rail

Creates side-to-side A4 suspended filing on a pull out filing frame.

### Pull-Out Shelf

A pull-out shelf to allow staff to reference and quickly edit files whilst at the unit.
