FLEXIGLIDE MK2 SPECIFICATION GUIDE

flexiglide mk2

With plain or decorative sound-absorbing sliding door fronts, the Flexiglide MK2 gives you access to your storage in minimal space.

FLEXIGLIDE MK 2

Pictured Right: Flexiglide MK2 single bay sliding decorated door storage.
800mm (w) x 500mm (d) x 740mm (h). Finishes: white steel and oak MFC top.

HOW TO SPECIFY FLEXIGLIDE MK2

For example, to specify an all white 800mm (w) x 500mm (d) x 740mm (h) single bay sliding decorated door unit with an oak MFC top (pictured above) the code would be FG07408JWSJWSMOKD.

Flexiglide MK 2 has been designed to optimise space with sliding doors. The doors can be locked in both open and closed position so they slide together enabling easy access. Components are 100mm wider than the equivalent side opening tambour unit allowing 12% more filing per unit on average. The 2050mm and 1650mm wide storage are designed to sit at the end of back to back desking.

Double bay units allow full access to the interior while single bay units are limited to 50% access at any time. Single bays therefore cannot accept pull out components. The 2000mm and 2050mm wide units accept 2x 1000mm components. The 1600mm and 1650mm wide units take 2x 800mm components.

FLEXIGLIDE MK2 COMPONENTS

Each Jot storage has a selection of compatible components which help organise your office filing/ storage and equipment. Components can be mixed and matched to increase flexibility. Use the guides to the right to work

out which selection of components fit in your chosen storage. For advice or a full filing assessment, please call our expert survey analysts on 01274 706206.

STEP BY STEP GUIDE TO WORKING OUT THE CORRECT COMPONENTS.

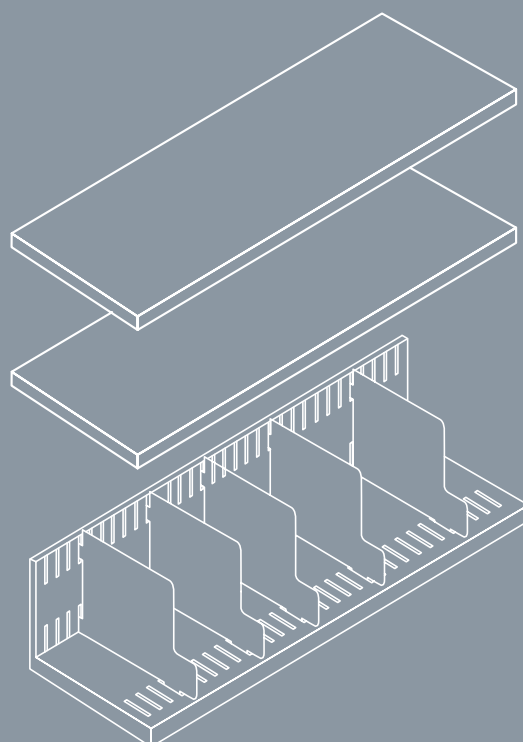

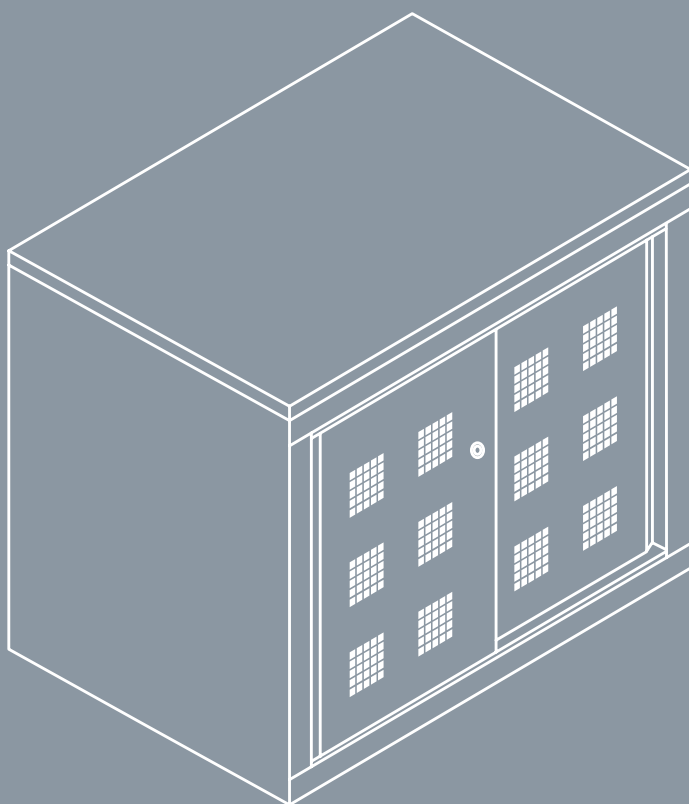

1. Use the internal height measurement guide to get the internal height of the chosen hinged door storage unit.
2. Using either mms or 1 inch slots as a measurement and the component guide, calculate which combination of components can fit in the storage.
3. Repeat with any additional storage unit.
4. Order the correct component's and accessories if desired. Each components width needs to match the width of the chosen hinged door unit.

Unit Example:

1. Lateral suspended filing rails.
 2. Pigeon holes with slotted shelf and dividers.
 3. Slotted shelf and dividers to hold A4 ring binders.
- These components together fit into 1350mm high Flexiglide MK2.

TIP

The bottom of the unit can be used as a shelf if desired. If used remember to leave space before inserting the next component. Any surplus internal space can be distributed throughout the unit.
